

Profile of Tungtai International Holding Group

Tungtai International Holding Group (hereinafter referred to as Tungtai International) devotes itself to be the practitioner of China-Europe urbanization and industrial sustainable development. Tungtai International mainly engages in industrial investment and industrial park operation, which is driven by its unique strategy in resources, talent and capital. Tungtai International focuses on four industries: energy conservation & environmental protection, intelligent manufacturing, healthcare, culture and education, Tungtai has project companies and offices in Germany, France, Hungary, Sweden and other countries and regions.

Tungtai International engages in developing cross-border incubators, accelerators, venture funds, small-town funds, innovation contest, expert think-tank, in work with famous industrial cluster, technological innovation institutions, scientific research institutions, financial organizations from home and abroad. The partners includes China Development Bank Venture Capital Co., Ltd, EU-China Industrial Investment and Promotion Association, China Real Estate Chamber of Commerce, China Environment Service Industry Association, Innovation Norway, Norwegian Energy and Environment Consortium, IVL Swedish Environmental Research Institute, Sweden Robotdalen Mälardalen University, Denmark

Cleantech Hub Denmark Odense Robot Valley, Finland Turku Science Park and Turku University of Applied Sciences etc.

All parties will carry out all-round cooperation in fields of industrial park cooperation, industrial project investment, ecological system cultivation, which aims to promote cross-border merger and acquisition, technology transfer, integration of quality resources, and connection between European advanced innovation capability and Chinese market.

Among this, The China-Europe Science and Technology Venture Capital Fund will engage in various forms of investment and incubation, such as providing fund investment and venture loan to the qualified participating projects, and guiding them to settle down in parks which are developed and operated by the Company, especially venture loan pilot parks and China-Europe characteristic towns of science, education, culture and tourism ecology.

Tungtai is exploring a new mode of industrial park operation with its external networks and internal ecological systems, where local governments, enterprises and other social and capital elements and resources interact with each other. Tungtai has developed three modes of industrial park operation: China-Europe International Innovation and Entrepreneurship Center, China-Europe Science and Education Industrial Park, China-Europe Characteristic Town of

Science, Education, Culture, Tourism and Ecology (China-Europe Wisdom and Scenic Town). Currently, business layouts have been launched in Zhejiang, Hubei and Shandong provinces and other areas.

In the field of industrial investment, Tungtai International has established partnership with AVIC International, HIT Robot Group and other first-rated industrial investment institutions, These international cooperation platforms such as AVIC International Tungtai Renewable Energy Co., Ltd., HIT Tungtai Scientific and Technological Equity Investment Development Limited Company has implemented the energy management contracting EMC project of Hungarian national urban public lighting, and carried out merger and acquisition of French L Robot Group etc.

Looking forward to the future and with “incubation”, “integration” and “innovation” as its key, Tungtai International strives to become the pivot and grip for the national strategy of China-Europe urbanization and industrial sustainable development and an important platform for China-Europe pragmatic cooperation.
